

Record Impression Speedgate

Shape positive impressions in your highest traffic areas

Impress your visitors with flexible, elegant and sophisticated speedgates from Record.

We encounter too few opportunities to shape aesthetic appreciation in the pursuit of functional goals. That changes with the Record Impression Speedgate. This innovative access control solution benefits from streamlined design, thoughtful accents and finish options, as well as seamless integration of leading HID technology. The result turns high flow passage into an opportunity to move.

The flexible constructs and attentive detailing of the Record Impression Speedgate creates new possibilities to impress: with its modular design ensuring that it can be installed as a single or multi-lane array (or even combined with a wide-lane setup), this speedgate is fully capable of integrating perfectly with any architectural style, as well as enabling access to all types of visitors.

Equipped with high processing capacity and an advanced detection system, the Impression Speedgate guarantees accurate user tracking and can reliably detect jump-overs and tailgating. Coupled with its wide range of color and material options, the Impression Speedgate supports functional purpose with true style.

What makes the Impression Speedgate stand out?

LED bands for intuitive user guidance

Three cabinet design options
(Open, Boxed or Center Glass)

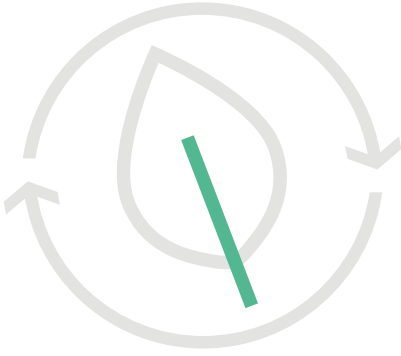

Pick and choose colors to match
your environment

Seamless integration of access control system
technologies and biometrics

Safe and secure operation with advanced
sensor technology

Energy-efficient and sustainable performance

Accessible for wheelchair users and people
with strollers

Sustainable by nature

Technology at its best: the Impression Speedgate switches into sleep mode when people flow has stopped for a short time. Minimal energy consumption – maximum sustainability for your environment.

Flow is in the details

The Impression Speedgate was designed to make the people flow experience as organic as possible. From the audiovisual feedback to the multiple passageway width options, this speedgate is designed for anyone and everyone.

Technical specifications

Power supply	110–240 VAC, 50 / 60 Hz
Control voltage	24 VDC
Operating temperature	+0°C to +55°C
Lane length	1200 / 1450 / 1700 mm
Passageway width	600 mm to 1100 mm
Wing heights	800, 1000, 1600 mm
Distance between wings and Finished Floor Level (FFL)	200 mm
Minimum opening/closing time	0,7 sec (depending on passageway width)
MCBF	10.000.000 mean cycles between failures (with recommended maintenance)
Noise level	55 dB at 1 m distance
IP Protection	IP41 (conforming with EU standards)

Essential features

Entrance security

The Impression Speedgate has a particularly high number of sensors, specifically designed for the detection of unauthorized users, jump-overs and tailgate attempts. Its ambient lighting concept is also a new and innovative way of guiding users through without any friction.

Safety for users

It's especially important for us at Record to make sure that this speedgate is safe for everyone. The Impression Speedgate is also fully compliant with all EU standards, guaranteeing the highest level of safety for users and building personnel alike.

Customizable design

Both elegant and futuristic in style, this speedgate is able to fit even the most sophisticated environments. With its many assorted design options, ranging from different materials to cabinet design, it's easier than ever to make sure the Impression Speedgate complements your building's interior atmosphere. Wherever you are.

Comfortable access for all

We created the Impression Speedgate for anyone and everyone to use without problems – no matter their age or physical abilities. With its option for choosing a wider passageway size, as well as the audiovisual guidance provided by the LED light bands and sound system, this speedgate is definitely accessible by all.

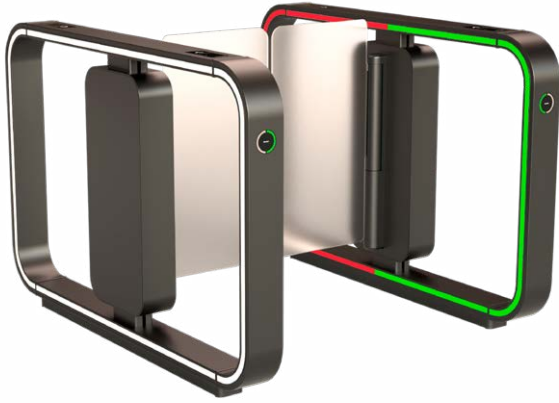

Choose your perfect passageway width and wing height from the Impression Speedgate's modular concept.

Different cabinet design options:

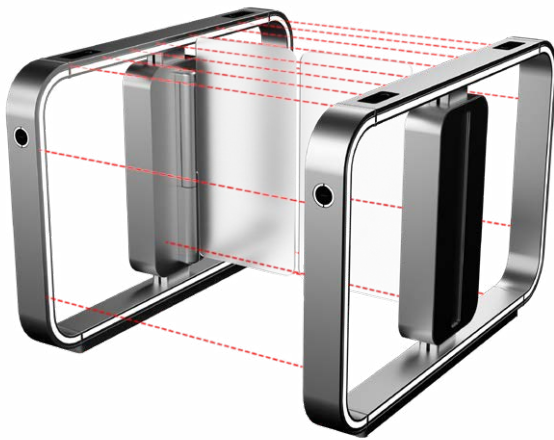

Ambient LED light bands

LED Pictogram

Safety and security sensors

Card reader cover (option)

Facial recognition – Powered by HID:
seamless integration of biometrics

Colors

The Record Impression Speedgate is available in all RAL colors; our way of making sure you find the one that best suits your environment. Choose your perfect shade, or even combine several colors to create a unique brand experience for your visitors.

This equipment should be installed, regularly inspected, maintained and serviced by trained and authorized personnel. Preventive maintenance plans are highly recommended for proper and safe operation. Speak to your Record representative to learn more about our service offering.
