

Meriton Head Office, Sydney

Case Study

Introducing the new entrance to Meriton's head office in Sydney, featuring a record DFA 127 automatic swing door operator. Working directly with Meriton's in house design team, the existing manual swing doors were replaced with a pair of frameless glass doors, one being larger to create an automatic entrance meeting necessary DDA requirements. To provide a striking entrance feature, record organised for the Meriton logo to be custom crafted into brass back to back door handles, weighing 20kg each, and mounted to the door wings.

For a staff only entrance, an STA 21au automatic single sliding door entrance, with frost frameless glass door panel, was also installed.
