

2 Elizabeth Plaza, North Sydney

Case Study

When the existing foyer entry to No 2 Elizabeth Plaza in North Sydney was upgraded in 2012 the generic straight sliding door entrance was replaced with a striking curved frameless glass entrance with an illuminated curved glass feature cylinder above.

The curved sliding doors are 2500mm high and 1500mm wide with the record RST curved operator mounted to a steel portal frame that is also supporting the curved frosted glass panels of the cylinder glazing above.
