

# Sovereign at The Star, Chairman's

## Case Study

For the expansion of The Star's VIP gaming area, Sovereign, record Automatic Doors was engaged to supply and install 11 automatic sliding door operators, to various entries and back of house areas. This included our STA 21 operators to buy in rooms, STA 20 operators to lobby areas and TSA 20 telescopic to entry corridors.

For this particular entrance to the exclusive Chairman's gaming area, record Automatic Doors installed two STA 22 operators at either side of the reception lobby. These operators are concealed within the ceiling and support bi-parting door leaves 4100mm high x 1100mm wide with a total weight of 320kg. These panels are made from custom designed steel framing clad in Rimex quartz champagne stainless steel sheet with frosted glazing, manufactured by our client Facade Innovations.
